2. Welcome to the District Signs

A staff project has been underway to replace the old welcome to the district signs on the district boundaries. Designs were developed in-house and previously sent out to elected members. They were then presented to the Community Boards and Community Committees where feedback was given to staff and minor changes were made following that feedback.

Funding for the signs is provided in operational budgets and Council staff will be undertaking the installation, with the appropriate traffic management requirements, and consents are not required. Consultation has occurred with NZTA, where no issues were raised. The revised designs were presented to the Executive Leadership Team and the next stage is to provide them to Council for their information. A copy of the final designs is attached.
